LITTLE ROACHES

## Mijn lievelings My all-time favourite

### Synopsis

*I leaned back in my office chair, my sweater warming my back. I am not from a dysfunctional family, I am not in love with my sweater. She is my favourite, but that is friendship, we carry each other.*

With some things you can be almost certain: if I have this, everything will be different. A new desk on which you will be able to work much more concentrated. A fresh notebook, in which you will now really write neatly to the end, or that one cookbook that you instantly transforms you into a chef after purchase. The story in this Little Roach is about such an object. A sweater to be precise. A sweater that is much more than just a sweater. A friend even.
