LITTLE ROACHES

Episode Episode

Synopsis

In June 2021, two new songs from Lucky Fonz III were launched: I'm a sucker as a single and as the b-side of the single Episode. Yes, singles still exist, both online and physically! A song as a heart under the belt for everyone who - temporarily or not - experiences severe stress. Special, because this is the first time that a new song is launched in combination with an illustrated version of the same song in Cockroach form, as an analog video clip!

The illustrations were made by Tzenko, known for his work for the VPRO guide. His powerful images seem simple and even innocent, but have an enormous expressiveness. More info on www.tzenko.com
