Surviving in the wild

A real adventurer (m/f) knows exactly how to light a fire in the wilderness, which constellations there are in the sky, where north and south are, how to stay warm, how to stay dry, how to bandage a wound with leaves, which nuts you can eat safely and when you are lost. And of course how to make a place to sleep when you forget your tent. All this even if you don't have WiFi to Google your way through. Because here is the book you need, which explains how you can do well outdoors. With clear step by step drawings and ultimate survival tips.
